***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gilliom et al (US 4,108,139) in view of Jeong et al (US 2003/0230571). Gilliom discloses oven comprising a cavity (Figure 2) in which food is cooked; and a base cover having: a cover body (68) installed under the cavity and contacting a mounting surface, a stepped portion (67) bent upward from an end of the cover body for supporting the cavity, at least one air intake hole (66) defined in the stepped portion (67) for sucking an outside air (Figure 2), and a reinforcement rib (Figure 2) protruded forwardly and/or backwardly from a periphery of the air intake hole (66). However, Gilliom does not disclose the oven being a microwave oven. Jeong discloses an oven being a microwave oven (abstract). It would have been obvious to one ordinary skill in the art at the time the invention was made to utilize in Gilliom an oven being a microwave oven as taught by Jeong in order to cook the food with microwave energy.
